**2. CITATIONS AND EXPLANATIONS**

Claims 1-37 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a contact bank used for signal communication being adapted to allow telecommunications line to be connected therewith including a plurality of tapping contacts directly or permanently electrically connected to the contacts of the module in a terminated condition of the bank, a smaller number of tapping contacts than tapping contacts, a plurality of remote-controllable switches for selectively electrically connecting the outlet contacts to the tapping contacts and a control device for controlling the plurality of switches.

Claims 1-37 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
